

## SCN Coship Tuning Instructions (LIVE)

First step in this procedure is to **Delete** all channels in the Manage Channel Menu if they exist.

1. Using the remote control, select MENU. Arrow down to **Manage Channel** and highlight the **Channel Edit**.
2. On the Remote, press the blue button, followed by the down arrow to select the first channel and repeat this for all other channels.
3. After all channels are selected to be deleted press the exit button on the remote. A warning should come up and ask if you want to save changes. Select "OK" to continue.
4. Now proceed to the following "Editing a Transponder" section.

### COSHIP Receiver - Editing a Transponder

- 1.0 Press the menu button.

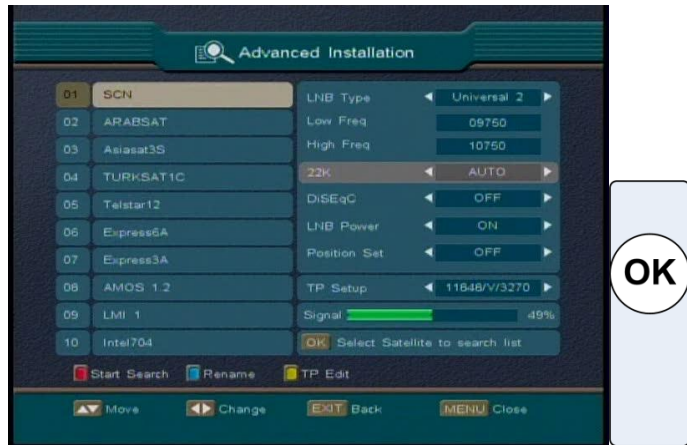

- 1.1 Press the Right arrow followed by the Down arrow to select Advanced Installation. Press OK.

This will bring up the Password Prompt. Using the number buttons, enter "0000".

1.2 Select SCN Satellite and Press OK.

1.3 Verify the following is correct in the right hand column:

**LNB Type      Universal 2**  
**Low Freq      09750**  
**High Freq      10750**  
**22k              Auto**  
**DiSEqC        Off**  
**LNB Power    On**  
**Position Set   OFF**

1.4 Press the Yellow Button to Edit Transponder:

- 1.5 Using the arrows and number buttons, edit the Transponder parameters, as follows:

**Frequency 11769**  
**Symbol Rate 03270**  
**Polarity VER**  
**Transmission DVB-S**  
**FEC Rate 5/6**  
**Modulation QPSK**  
**Pilot OFF**  
**NIT OFF**

- 1.6 Press EXIT on the remote control to go back to the left column to save parameters.

- 1.7 Press the Ok button to put a check mark beside the transponder.

- 1.8 With the transponder highlighted and checked, press the RED button on the remote to start scanning. If the Scanning screen shows that the service search is finished, but no services are listed, repeat the previous step. If the scan is successful, the screen should display 3 TV services and 0 radio services

- 1.9 You should see Learn 1, Learn 2 and Learn 3 in the TV column.

Press Menu one time on the remote control to exit and save parameters.

At this point, you should have active video. If you do not see any video or hear any audio, please contact the SCN Helpdesk for further support.
